The Hongkong and Shanghai Banking Corporation Limited, Singapore Branch, was the Issue Manager for the listing of K-Green Trust on the Main Board of SGX-ST. The Issue Manager assumes no responsibility for the contents of this announcement.

INTRODUCTION

K-Green Trust (“KGT” or “Trust”) is a business trust constituted on 23 July 2009 under the laws of Singapore and managed by Keppel Infrastructure Fund Management Pte. Ltd. as Trustee-Manager of KGT.

KGT was registered under the Business Trusts Act with the Monetary Authority of Singapore on 27 May 2010 and listed on the Singapore Exchange Securities Trading Limited on 29 June 2010 (the Listing Date).

The investment objective of KGT is to invest in “green” infrastructure assets (including, but not limited to, waste management, water and wastewater treatment, renewable energy, energy efficiency and other “green” initiatives) in Singapore and globally with a focus on Asia, Europe and the Middle East.

On 31 August 2009, KGT completed the acquisition of Senoko Plant, during which KGT was held as a private trust. On the Listing Date, KGT acquired Tuas DBOO Plant and Ulu Pandan Plant. All of the Plants have commenced commercial operations.

KGT, being a business trust, is allowed to pay distributions to unitholders out of its residual cash flows, in accordance with the distribution policy as set out on Page 34 of the Introductory Document dated 31 May 2010 (“Introductory Document”). This is unlike companies, which are governed by the Companies Act. Companies can only make dividend payments out of accounting profits.

Infrastructure assets, such as those held by KGT, are suitable for injection into a business trust as they are able to offer long-term, regular and predictable cash flows.

COMPARATIVE STATEMENTS

We have not presented a comparative statement for the corresponding period of the immediately preceding financial year for the following reasons:

- (a) even though KGT would have been in existence since 23 July 2009, Senoko Plant was only acquired by KGT on 31 August 2009 when it was held as a private trust up to the Listing Date. Both Tuas DBOO Plant and Ulu Pandan Plant were acquired by KGT, through the Tuas DBOO Trustee and the Ulu Pandan Trustee, respectively on the Listing Date;
- (b) while the audited accounts of KGT is available for the financial year ended 31 December 2010, it will not be meaningful to compare the current period results against the results for first six months of FY2010 as the accounts will contain financial information for only one out of three Plants.

However, where appropriate, comparisons are made against the pro-rated projected figures for the period from 1 January 2011 to 30 June 2011 (the “Projection”) as disclosed in the Introductory Document.

4 **ACCOUNTING POLICIES**

Except as disclosed in paragraph 5 below, the accounting policies and methods of computation in the financial statements for the current financial period are consistent with those of the audited financial statements as at 31 December 2010.

5 **CHANGES IN THE ACCOUNTING POLICIES**

The Group adopted the new/revised FRS that is effective for annual periods beginning on or after 1 January 2011. Changes to the Group's accounting policies have been made as required, in accordance with the transitional provisions in the respective FRS.

The following amended FRS is relevant to the Group:

Improvements to Financial Reporting Standards (issued in October 2010)
FRS 24 (Revised) - Related Party Disclosures

Consequential amendments were also made to various standards as a result of these new/revised standards.

The adoption of the above FRS did not have any significant impact on the financial statements of the Group.

9 REVIEW OF PERFORMANCE

Profit and Loss Analysis

The revenue of KGT was derived mainly from three components: 1) Recognition of construction revenue arising from the flue gas treatment upgrade based on percentage of completion method during the construction phase, this amounted to \$9.5 million for the second quarter, bringing construction revenue to \$12.0 million for the half year period; 2) Finance income was \$9.1 million for half year, which represents the accretion on the service concession receivables in respect of the fixed capital cost and recovery components; 3) Revenue from operation and maintenance (O&M) was \$11.9 million for the second quarter and \$23.0 million for the first half of this year. The service concession agreements allow for annual adjustments to the O&M tariffs to account for changes in consumer price index.

The construction expense of \$9.0 million and \$11.4 million relates to the amount of capital expenditure spent on the flue gas treatment upgrade during the second quarter and half year respectively. The main operating expenses are: electricity cost, operation and maintenance cost, property tax, insurance, Trustee-Manager’s fees and other administrative costs. Profit before tax was \$4.6 million for the second quarter and \$8.2 million for half year. After taking into account income tax expenses, net profit was \$4.4 million and \$7.9 million for the second quarter and 1H 2011 respectively.

For a review of the actual performance against the projection period 1 January 2011 to 30 June 2011 as disclosed in the Introductory Document, please refer to Paragraph 10 below.

Balance Sheet and Cash Flow Analysis

Group unitholders' funds decreased from \$726.1 million at 31 December 2010 to \$708.8 million at 30 June 2011. The decrease was mainly attributable to the distribution of \$27.1 million paid to unitholders during the period, partially offset by increase in comprehensive income for the period of \$7.9 million, and the creation of new units for payment of Trustee-Manager's fees of \$1.8 million for FY 2010.

Total assets of the Group amounted to \$735.5 million at 30 June 2011 and was \$26.4 million lower than the previous year end. Service concession receivables, representing the right of KGT to receive fixed and determinable amounts of payment during the concession period, decreased by \$6.4 million for the period, offset by higher debtors of \$4.2 million mainly due to receivables from a government agency in relation to reimbursement of property taxes. Group total liabilities decreased by \$9.2 million to \$26.7 million compared to \$35.9 million in the previous year end mainly due to payment of income tax.

At the trust level, notes receivable of \$290.1 million represents qualifying project debt securities ("QPDS") issued to KGT by Senoko Trust, Tuas DBOO Trust and Ulu Pandan Trust ("Sub-Trusts") to fund the acquisition of the businesses in FY2010. These QPDS are eliminated on consolidation.

As at 30 June 2011, the Group had no external borrowing.

Cash generated from operations of \$21.7 million was derived from the Group's pre-tax profit of \$8.2 million, after adjusting for non-cash items and changes in working capital of \$13.4 million for first half year of 2011. Taking into account income taxes paid, cash flow from operating activities was \$15.2 million for the half year. Net cash used in investing activity for the second quarter was \$7.1 million and \$12.4 million for the half year. This was mainly due to payments made for the flue gas treatment upgrading contract. The net decrease in cash and cash equivalents was \$6.7 million for the second quarter. Including the distribution payment of \$27.1 million paid earlier this year, net decrease in cash and cash equivalents for the first half year was \$24.4 million.

KGT, being a business trust, is allowed to pay distributions to unitholders out of its residual cash flows, which was largely derived from the operating cash flow generated from operations of the Sub-Trusts. For 1H 2011, the Group will be distributing 3.13 cents per unit to its unitholders as forecasted in the Introductory Document. Please refer to paragraph 7 for more details.

¹ The projection figures are derived by pro-rating equally the projection year from 1 January 2011 to 31 December 2011 ("Projection Year 2011"). The Projection Year 2011 is extracted from the Introductory Document and is based on the assumptions set out in the document.

Review of Performance for the half year ended 30 June 2011 (actual vs projection)

Revenue of \$44.1 million was 15.8% higher than the projection of \$38.1 million. This was mainly due to higher recognition of construction revenue by \$4.1 million following a shift in schedule of the flue gas upgrading works for Senoko Plant from FY2010 to FY2011. The flue gas upgrade project is in progress and the Engineering, Procurement and Construction (EPC) contractor will continue to accelerate the construction progress in FY2011. The upgrade is scheduled to be completed by June 2012. Operation and maintenance income was \$23.0 million which is 9.1% higher than projection mainly contributed by Ulu Pandan due to higher tariffs (as a result of higher CPI indexation than projected) in the new contract year.

For the same reason above, construction expense incurred on the EPC contract was above projection by \$3.9 million. The O&M cost was slightly higher than projection by 5.7% on account of higher output from the three plants. Electricity cost was 27.0% higher due to increase in electricity consumption on the higher volume of NEWater delivered as well as higher electricity prices than projected. Trust expense was 53.9% lower as actual expenses were less than projected.

Operating profit was \$1.1 million better than expected. Overall, profit for the period of \$7.9 million exceeded projection by 16.9%.

11 PROSPECTS

The underlying performance of the three assets in KGT's portfolio is expected to remain stable. All three assets have long-term concession agreements with Singapore statutory bodies (namely NEA and PUB). Senoko Trust and Tuas DBOO Trust derive most of their income from capacity payments, which offer a stable source of income with little correlation to economic or demographic fluctuations. Ulu Pandan Trust's income is derived in equal parts from availability payments and from NEWater output payments. Demand for NEWater is subject to PUB's availability of other sources of water supply. Cleaning and maintenance activities during the year may reduce revenue and costs but are not expected to have a material impact on the profitability of the plants.

Ulu Pandan Trust's cash earnings is dependent on changes in power revenue received from PUB and changes in electricity price. The Trustee-Manager has taken measures to fix the price of electricity up to the end of FY2011 after monitoring the fluctuations in electricity price for the past year.

The flue gas treatment upgrade project for Senoko Plant is in progress and the EPC contractor will continue to accelerate the construction progress in FY2011. The upgrade is scheduled to be completed by June 2012.

The DPU for FY2011 is expected to be on track with the Forecast DPU disclosed in the Introductory Document.

In line with KGT's growth strategy, the Trustee-Manager will continue to review acquisition opportunities during the year, including assets which were identified under the Rights of First Refusal (ROFR).
